ROMAN OKHREMOV

Frontend / Full-Stack Developer | React · Next.js · TypeScript · Node.js

Khmelnytskyi, Ukraine • romariotraveler@gmail.com
GitHub: github.com/RomanFrontEndDeveloper • LinkedIn: linkedin.com/in/roman-okhremov-9b0764369
Portfolio: portfolio-react-roman-okhremov.netlify.app

PROFESSIONAL SUMMARY

Frontend / Full-Stack Developer focused on building modern web applications with React, Next.js, TypeScript, and Node.js. Hands-on project experience designing REST APIs, structuring pnpm monorepos, integrating databases and external services, and implementing authentication, validation, caching, background processing, and automated tests. Interested in maintainable architecture, reliable data flows, performance, and production-oriented development.

TECHNICAL SKILLS

Frontend	React 19, Next.js 16 (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, Tailwind CSS, CSS Modules, Framer Motion, React Hook Form, Zod, TanStack Query, Axios
Backend	Node.js, Express.js, TypeScript, REST APIs, MongoDB, Mongoose, PostgreSQL, SQL, Prisma ORM, JWT, bcrypt, Multer
Architecture & Data	Feature-First Architecture, pnpm monorepos, CRUD, RBAC, ownership-based authorization, centralized error handling, Redux Toolkit, React Context API
Infrastructure & Testing	Redis, BullMQ, Docker, Docker Compose, Vitest, Git, GitHub, Postman, Swagger, ESLint, Prettier, Vercel, Render
Integrations	Cloudinary, SalesDrive CRM API, Telegram Bot API, Open-Meteo API, geocoding and map APIs

PROJECTS

WeatherPulse — Full-Stack Weather Application

Stack: Next.js, React, TypeScript, Node.js, Express, PostgreSQL, Prisma, Redis, BullMQ, Zod, Vitest, Docker, Docker Compose, pnpm

Live: weather-from-roman.vercel.app • GitHub: github.com/RomanFrontEndDeveloper/weather_from_roman

- Built a full-stack weather application with a Next.js frontend and a separate Express REST API, organized as a pnpm monorepo.
- Integrated the Open-Meteo Geocoding and Forecast APIs; validated external responses with Zod and added retry and HTTP error handling.
- Implemented PostgreSQL persistence with Prisma ORM, schema management, migrations, and weather search history.
- Added Redis cache-first weather retrieval with a configurable 10-minute TTL and graceful degradation when Redis is unavailable.
- Implemented asynchronous history storage using BullMQ, Redis, and a separate background Worker, keeping database writes outside the API response path.
- Containerized the frontend, backend, PostgreSQL, and Redis with Docker Compose.
- Added backend automated tests with Vitest, including service behavior, error handling, and mocked external/Redis/queue dependencies.

Roman Real Estate — Full-Stack Marketplace Platform

Stack: Next.js 16, React 19, TypeScript, Tailwind CSS, Node.js, Express, MongoDB, Mongoose, JWT, Cloudinary, TanStack Query, Zod

Live: roman-real-estate-2.vercel.app • GitHub: github.com/RomanFrontEndDeveloper/roman-real-estate-2

- Engineered a full-stack real estate marketplace using Next.js App Router, a Node.js/Express REST API, and MongoDB.
- Organized the codebase as a pnpm monorepo with Feature-First Architecture.
- Implemented authentication with short-lived access tokens, refresh tokens, HttpOnly cookies, automatic token refresh, RBAC, and ownership-based authorization.
- Built property management, multi-criteria search and filtering, URL-based filter state, sorting, and pagination.
- Integrated property image management with Cloudinary, interactive map views, and location geocoding.
- Applied MongoDB indexes, query optimization, API rate limiting, input validation, and centralized error handling.

Lead Integration App — CRM & Automation Platform

Stack: Next.js, TypeScript, SalesDrive CRM API, Telegram Bot API, Tailwind CSS, Zod

GitHub: github.com/RomanFrontEndDeveloper/lead-integration

- Built a lead collection flow with client- and server-side Zod validation and anti-spam safeguards.
- Integrated SalesDrive CRM and Telegram Bot API for automated lead routing and operational notifications.
- Handled integrations securely through Next.js server-side functionality and API routes.

EXPERIENCE

Independent Project Developer / Freelance — Full-Stack Developer

2023 — Present | Khmelnytskyi, Ukraine

- Design and develop responsive full-stack applications using React, Next.js, TypeScript, and Node.js.
- Build REST APIs and database-backed features with MongoDB/Mongoose and PostgreSQL/Prisma.
- Implement authentication, authorization, input validation, external API integrations, and structured error handling.
- Apply performance techniques including SSR, SSG, lazy loading, and image optimization.
- Use Git/GitHub, pnpm workspaces, debugging, refactoring, and cloud deployment workflows.

EDUCATION

Khmelnytskyi National University — Engineering Degree | 2008 — 2013

LANGUAGES

Ukrainian: Native • English: B2 (Upper-Intermediate) • Polish: B1 (Intermediate)
